Web Mining (CSE3024)

Lab Assignment 4

Name: Kritika Mishra

Registration Number: 16BCI0041

Slot: L15+L16

Date: 29th August 2018

Question:

Write a python program to perform the following encoding for the ODD numbers between 1 – 30

- i) Elias Gamma
- ii) Elias Delta
- iii) Golomb (b = 10)

Code:

```
#!/usr/bin/python
from math import log, ceil
log2 = lambda x: log(x,2)
def binary(x, l=1):
    fmt = '{0:0\%db}' \% 1
    return fmt.format(x)
def unary(x):
    return x*'1'+'0'
def elias generic(lencoding, x):
    if x == 0: return '0'
    1 = 1 + int(log2(x))
    a = x - 2**(int(log2(x)))
    k = int(log2(x))
    return lencoding(1) + binary(a,k)
def golomb(b, x):
    q = int((x) / b)
    r = int((x) \% b)
    1 = int(ceil(log2(b)))
    #print q,r,l
    return unary(q) + binary(r, 1)
def elias gamma(x):
```

```
return elias_generic(unary, x)

def elias_delta(x):
    return elias_generic(elias_gamma,x)

print("    i: Elias Gamma: Elias Delta: Golomb")

for i in range(31):
    if(i%2!=0):
        print("%5d: %-10s : %-10s : %-10s" %(i,
elias_gamma(i),elias_delta(i), golomb(10,i)))
```

```
